DRAFT ORDER

Dated: 4 March, 2016

In exercise of the powers vested under Sections 61, 66 and 86 read with Section 181 of the Electricity Act (EA), 2003 and other powers enabling it in this behalf, the Maharashtra Electricity Regulatory Commission (MERC) has notified the MERC (Terms and Conditions for Determination of Renewable Energy (RE) Tariff) Regulations, 2015, (“the RE Tariff Regulations”) on 10 November, 2015. The RE Tariff Regulations specify the Terms and Conditions and the Procedure for determination of Generic Tariff by the Commission in respect of the following RE Generating Stations:

- (a) Wind Power Projects;
- (b) Biomass-based Power Projects;
- (c) Non-Fossil Fuel-based Co-Generation Projects;
- (d) Mini/Micro and other Small Hydro Power Projects;
- (e) Solar Photo Voltaic (PV)/Solar Thermal Power Projects;
- (f) Solar Roof-top PV Systems Power Projects

2. Regulation 9.1 of the RE Tariff Regulations requires the Commission to determine suo-moto the Generic Tariffs for the RE technologies for which norms have been specified in the Regulations:

“9.1 The Commission shall notify the generic tariff at the beginning of each year of the Review Period considering the norms specified by the Central Commission from time to time with regard to the respective RE technologies:

Provided that, for the first year (FY 2015-16) of the Review Period, the generic tariff may be determined by the Commission within three months from the date of notification of these Regulations.”

3. Subsequent to the notification of the RE Tariff Regulations, 2015 on 10 November, 2015 the Commission, vide its Order dated 25 January, 2016 in Case No 135 of 2015, has determined the Generic Tariff for RE Technologies for the period of FY 2015-16 from the date of publication of the RE Tariff Regulations in the Official Gazette as per Regulation 1.2 of the RE Tariff Regulations, i.e., from 10 November, 2015 to 31 March, 2016.

4. Accordingly, the Commission, in discharge of its mandate under Regulation 9.1 of RE Tariff Regulations, 2015, proposes to determine the Generic Tariff for RE Technologies for the Tariff Review Period of FY 2016-17 in accordance with this draft Order, and has invited public comments, objections and suggestions.

1. Common Parameters for determination of Generic Tariff

This Section details the applicable norms for determination of Generic levelised Tariff which are common to all types of RE technologies as specified in the RE Tariff Regulations.

1.1. REVIEW PERIOD

Regulation 6.1 of the RE Tariff Regulations specifies that the Review Period for determination of Tariff for RE Projects shall be five years, starting from the date of notification of the RE Tariff Regulations. The first year of the Review Period is FY 2015-16, and the Regulations were notified on 10 November, 2015. The second year of the Review Period is from 1 April, 2016 to 31 March, 2017.

1.2. TARIFF STRUCTURE

Regulation 10 of the RE Tariff Regulations specifies that the Tariff for RE Projects shall be a single-part Tariff consisting of the following fixed cost components:

- (a) Return on Equity;
- (b) Interest on loan capital;
- (c) Depreciation;
- (d) Interest on working capital;
- (e) Operation and maintenance expenses.

For RE technologies with a fuel cost component, like Biomass-based Power Projects and Non-fossil fuel-based Co-Generation Projects, a single-part Tariff with two components, viz., fixed cost and fuel cost, has been determined under this Order. The relevant cost

components and basis for determination of Generic Tariff in respect of each RE technology have been elaborated under the technology-specific Sections of this Order.

1.3. TARIFF DESIGN

As per Regulation 11, the Tariff Design for RE Generating Stations is as under:

“11.1 The tariff shall be determined on a levelised basis for the Tariff Period:

Provided that, for RE Projects having a single-part tariff with two components, the tariff shall be determined on a levelised basis considering the year of commissioning of the Project for the fixed cost component, while the fuel cost component shall be specified on the basis of the year of operation.

11.2 For the purpose of computation of levelised tariff, a discount factor equivalent to the normative post-tax weighted average cost of capital shall be considered.

11.3 Levelisation shall be carried out for the ‘useful life’ of the RE Project, while tariff shall be determined for the period equivalent to the Tariff Period.”

1.4. INTEREST ON LOAN

Regulation 15.1 specifies that a loan tenure of 12 years is to be considered for determination of Generic Tariff for RE Projects. Regulation 15.2 provides for consideration of the rate of interest on loan as follows:

“The quantum of loan arrived at as specified above shall be considered as gross normative loan for calculation for interest on loan. The normative loan outstanding as on 1st April of every year shall be worked out by deducting the cumulative repayment up to 31st March of previous year from the gross normative loan.

For the purpose of computation of tariff, the Base Rate of the State Bank of India prevailing during the previous year plus 300 basis points shall be considered as the normative interest rate.

Notwithstanding any moratorium period availed, the repayment of loan shall be considered from the first year of commercial operation of the Project and shall be equal to the annual depreciation allowed.”

The Base Rate as notified by State Bank of India (SBI) for the period from 1 April, 2015 to 29 February, 2016, is as below:

Period		Base Rate (%)	Period (No. of days)
05 October 2015	22 February 2016	9.3	141
08 June, 2015	04 October, 2015	9.7	119
10 April, 2015	07 June, 2015	9.85	59
01 April, 2015	09 April, 2015	10	9
Weighted Average Base Rate		9.56	

Accordingly, the weighted average of the SBI Base Rate for the period from 1 April, 2015 to 22 February, 2016 as shown in the above Table, plus 300 basis points, works out to an interest rate of 12.56% p.a. (9.56% + 300 basis points), which has been considered as the normative interest rate on long-term loans for computation of levelised Tariff for RE technologies in this draft Order.

1.5. INTEREST ON WORKING CAPITAL

Regulation 18.3 of the Regulations provides for computation of the rate of Interest on Working Capital (IoWC) as under:

"Interest on Working Capital shall be the average of the Base Rate of State Bank of India prevalent during the previous year, plus 350 basis points."

Accordingly, the weighted average SBI Base Rate for FY 2015-16 as shown in the above Table, plus 350 basis points, works out to an interest rate of 13.06 % (9.56% + 350 basis points), which has been considered as the normative interest rate on Working Capital for computation of levelised Tariff for RE technologies in this Order.

1.6. LEVELISED TARIFF

Levelised Tariff is computed by carrying out levelisation over the useful life of each technology considering a discount factor equivalent to the normative post-tax weighted average cost of capital, to represent the time value of money.

Discount Factor

The discount factor considered for this purpose is 10.55 %, which is equal to the normative post-tax weighted average cost of capital on the basis of normative debt-equity ratio of 70:30 specified in the Regulations, and weighted average rates for the debt and equity components.

Interest Rate considered for the loan component (i.e., 70%) of Capital Cost is 12.56%. For the equity component (i.e., 30%), rate of Return on Equity (RoE) shall be computed at the base rate of 16%, grossed up as per the applicable tax rate. The rate of RoE is to be computed by grossing up the base rate with the tax rate equivalent to Minimum Alternate Tax (MAT) for the first 10 years from the Commercial Operation Date (COD), and the normal tax rate for the remaining years of Project life. Based on these rates and the debt-equity ratio, the weighted average RoE has been calculated, which ranges from 22% to 23% depending on the useful life of RE technologies. The discount factor for each technology

derived by this method is detailed in the respective technology-specific Sections of this Order.

Note: The Discount Factor is computed as $10.55\% = ((12.56\% \times 0.70 \times (1 - 34.61\%)) + (16.00\% \times 0.30))$

1.7. GRANT, SUBSIDY OR INCENTIVE FROM THE CENTRAL/STATE GOVERNMENTS

Regulation 24 of the RE Tariff Regulations specifies that:

“The Commission shall take into consideration any grant, subsidy or incentive offered by the Central or State Government or their agencies, including accelerated/additional depreciation benefit, if availed, while determining the tariff under these Regulations:

Provided that the State Nodal Agency shall inform the Distribution Licensee regarding any such grant, subsidy or incentives received by a Project Entity on a quarterly basis;

Provided further that any such grant, subsidy or incentives availed by a Project Entity shall be deducted by the Distribution Licensee in subsequent bills raised by the particular Project Entity towards sale of electricity in suitable instalments or within such period as may be stipulated by the Commission;

Provided also that the following principles shall be considered for ascertaining the Income Tax benefit on account of accelerated or additional depreciation, if availed, for the purpose of tariff determination:

a. The assessment of benefit shall be based on normative Capital Cost, accelerated/additional depreciation rate as per the relevant provisions of the Income Tax Act and the Corporate Income Tax rate;

b. Capitalisation of RE Projects for the full financial year;

c. Per-unit benefit shall be derived on levelised basis at a discounting factor equivalent to the post-tax weighted average cost of capital;

Provided also that, in case the Central or State Government or their agencies provide any generation-based incentive which is specifically over and above the tariff, such incentive shall not be taken into account while determining the tariff.”

Accordingly, for Projects availing the benefit of accelerated depreciation, the applicable Corporate Income Tax rate of 34.61% (30% Income Tax rate + 12% surcharge + 3% Education Cess) has been considered. For determining the net depreciation benefits, depreciation @ 5.28% as per Straight Line Method (book depreciation as per Companies Act, 2013) has been compared with depreciation as per the Income Tax Act, i.e., 80% under Written Down Value method. Moreover, additional 20% depreciation in the initial year is proposed to be extended to new assets acquired by Generation Companies vide amendment to Section 32 (1) (ii a) of the Income Tax Act.

Depreciation for the first year has been calculated at the rate of 100% of 80%, and 100% of the additional depreciation of 20%, assuming the Project to be capitalized for the full financial year as per the second proviso to Regulation 24. The tax benefit has been worked out as per the Corporate Income Tax rate on the net depreciation benefit. The 'per unit levelised accelerated depreciation benefit' has been computed considering the weighted average cost of capital as discounting factor, as detailed in para 1.6 of this Order. The detailed computation of benefit of accelerated depreciation in respect of each RE technology has been covered under the technology-specific Sections.

Further, as per the second proviso to Regulation 24, in case the Central or State Government or their agencies provide any generation-based incentive which is specifically over and above the Tariff, such incentive shall not be taken into account while determining the Tariff. Thus, while determining the Tariffs for RE Projects in this Order, no such incentives have been considered.

1.8. SHARING OF CDM BENEFITS

As per Regulation 22, all risks, costs and efforts associated with the availing of carbon credits shall be borne by the Project Entity. Further, the entire proceeds of carbon credit from an approved Clean Development Mechanism (CDM) Project, if any, shall be retained by it.

1.9. APPLICABILITY OF TARIFF ORDER

This Tariff Order shall be applicable for New RE Projects to be commissioned during the period from 1 April, 2016 to 31 March, 2017.

In case of Biomass-based Power Projects and Non-Fossil fuel-based Co-generation Projects commissioned on or before 1 April, 2016, the Variable Charge component of the Tariff shall be determined as set out in the relevant provisions of this Order. The Fixed Charge component of the Tariff of such Projects shall continue to be governed by the relevant Orders of the Commission.

The applicable Tariff Rate, Tariff Structure and other terms and conditions for other RE Projects commissioned on or before 31 March, 2015 will be in accordance with the provisions of the relevant Generic RE Tariff Orders.

The following Sections of the Order outline the technology-wise norms and corresponding Generic Tariffs for New RE Projects to be commissioned from 1 April, 2016 to 31 March, 2017 based on various RE technologies.

2. WIND ENERGY PROJECTS

2.1. USEFUL LIFE

Regulation 2.1 (mm) of the RE Tariff Regulations defines ‘useful life’ in relation to a Unit of a Generating Station (including evacuation system) to mean the duration from the COD till such time as specified under the Regulations. Accordingly, the useful life for Wind Energy Projects as specified under Regulation 2.1 (mm) is 25 years from COD.

2.2. TARIFF PERIOD

Regulation 7 specifies the Tariff Period for various RE Projects. Accordingly, the Tariff Period for Wind Energy Projects is 13 years, considered from the COD of the Wind Project, and the Tariff determined under the Regulations shall be applicable only for the duration of the Tariff Period.

2.3. CAPACITY UTILISATION FACTOR

Under Regulation 28 of the RE Tariff Regulations, the norms for Capacity Utilization Factor (CUF) specified for Wind Energy Projects are as under:

<i>Wind Zone</i>	<i>Annual Mean Wind Power Density (W/m²)</i>	<i>CUF</i>
<i>Zone 1</i>	<i><=250</i>	<i>22%</i>
<i>Zone 2</i>	<i>>250 - <=300</i>	<i>25%</i>
<i>Zone 3</i>	<i>>300 - <=400</i>	<i>30%</i>
<i>Zone 4</i>	<i>>400</i>	<i>32%</i>

Provided that these CUF norms may be revised by the Commission through general or specific Order considering data that may become available subsequently.”

In accordance with Regulation 28.2, the annual mean wind power density is to be measured at 80 metre hub-height.

2.4. CAPITAL COST

The Capital Cost for Wind Energy Projects shall include the cost of Wind Turbine Generator (WTG), including its auxiliaries, land cost, site development charges and other civil works, transportation charges, evacuation cost up to inter-connection point, financing charges and Interest during Construction (IDC), and capital investment relating to forecasting and scheduling. Accordingly, as specified in Regulation 26.2, the Commission considers the Capital Cost for Wind Energy Projects as Rs. 600.74 lakh/MW for the first year of the Review Period. The same has been escalated considering the indexation mechanism specified in the Central Electricity Commission (CERC) RE Tariff Regulations, as stipulated in Regulation 27 of this Commission’s RE Tariff Regulations. The detailed calculation is as shown below.

Indexation Formulation

$$CC(n)=P\&M(n)*[1+F1+F2+F3]$$

$$dn = (a*(SI_{n-1}/SI_0)-1)+b*(EI_{n-1}/EI_0-1))/(a+b)$$

$$P\&M(n)=P\&M(0)*(1+dn)$$

CC_n(Rs. Lakh/MW)	Capital Cost for the nth Year (FY2016-17)	608.8

2.5. DEBT-EQUITY RATIO

Regulation 14.1 of the RE Tariff Regulations, 2015 provides that the debt-equity ratio of 70:30 is to be considered for determination of Generic Tariff. In accordance with the normative debt-equity ratio and the above Capital Cost, the debt and equity components for Wind Energy Projects work out to Rs. 426.19 lakh per MW and Rs. 182.65 lakh per MW, respectively.

2.6. RETURN ON EQUITY

Regulation 17.2 stipulates the normative Return on Equity (RoE) as under:

“The Return on Equity shall be computed at the base rate of 16%, to be grossed up as per the applicable tax rate. The rate of Return on Equity shall be computed by grossing up the base rate with the tax rate equivalent to Minimum Alternate Tax (MAT) for the first 10 years from COD, and the normal tax rate for the remaining years of Project life.”

Accordingly, the RoE for the applicable period of this Order works out as under:

Opening Equity (Rs lakh / MW)	182.65
Return on Equity for first 10 years @16% grossing up with MAT rate of 21.34% (Rs lakh per MW)	37.15
Return on Equity after first 10 years @16% grossing up with Income Tax rate of 34.61% (Rs lakh per MW)	44.69

Note :- Grossing up of RoE is done as per the Formula: $RoE(\%) / [1 - Tax\ Rate(\%)]$

2.7. INTEREST ON LOAN

As explained in para. 1.4 of this Order, the interest rate of 12.56% (9.56% + 3%) has been considered for Wind Energy Projects for a loan amount of Rs. 426.19 lakh per MW.

2.8. DEPRECIATION

Regulation 16 specifies that depreciation is to be allowed up to a maximum of 90% of the Capital Cost of the asset. The depreciation rate for the first 12 years of the Tariff Period shall be 5.83% per annum, and the remaining depreciation shall be spread over the remaining useful life of the Project from the 13th year onwards.

Accordingly, for Wind Energy Projects, the depreciation rate is 5.83% for the first 12 years, and works out to 1.54% thereafter for the remaining useful life of 13 years.

2.9. INTEREST ON WORKING CAPITAL

Regulation 18.1 of the RE Tariff Regulations, 2015 provides for computation of the Working Capital requirements of Wind Energy Projects as under:

"(a) Operation & Maintenance expenses for one month;

(b) Receivables equivalent to Two months of tariff for sale of electricity calculated on the normative CUF;

(c) Maintenance spares @ 15% of O & M expenses."

Further, as explained earlier at para. 1.5, IoWC shall be computed at an interest rate equivalent to the average Base Rate of SBI during the previous year plus 350 basis points. Para. 1.4 of this Order shows that the average Base Rate of SBI for FY 2015-16 is 9.56%. Accordingly, the rate of IoWC for Wind Energy Projects for the period from 1 April, 2016 to 31 March, 2017 works out to 13.06% (9.56% + 350 basis points).

2.10. OPERATION AND MAINTENANCE EXPENSES

Regulation 29 of the RE Tariff Regulations specifies the normative O&M expenses for Wind Energy Projects for FY 2015-16 (Base Year) as 1.47 % of the Capital Cost, which works out to Rs. 8.83 lakh/MW for FY 2015-16. This is to be escalated at the rate specified in the Regulations of the Commission governing Multi Year Tariff (MYT) over the Tariff Period, as per Regulation 29.2 of the RE Tariff Regulations, for determination of the levelised Tariff. Regulation 45.1(d) of the MYT Regulations, 2015 specifies the norms for escalation of O&M expense in subsequent years beyond the base year:

"The O&M expenses for each subsequent year shall be determined by escalating the base expenses determined above for FY 2015-16, at the inflation factor considering 60% weightage for the actual point to point inflation over Wholesale Price Index numbers as per Office of Economic Advisor of Government of India in the previous year and 40% weightage for the actual Consumer Price Index for Industrial Workers (all India) as per Labour Bureau, Government of India in the previous year, as reduced by an efficiency factor of 1%, to arrive at permissible O and M expenses for each year of the Control Period."

Accordingly, the computation for the escalation percentage for Operation and Maintenance (O&M) expense is as presented in the Table below:

Wholesale Price Index												
Year	Jan.	Feb.	March	April	May	June	July	August	Sept.	Oct.	Nov.	Dec.

Accordingly, the Commission has considered O&M expense norm for Wind Energy Projects as Rs 9.07 lakh per MW for FY 2016-17.

2.11. LEVELISED TARIFF FOR NEW WIND ENERGY PROJECTS FROM 1 APRIL, 2016 TO 31 MARCH, 2017

Accordingly, the Generic Tariffs for Wind Energy Projects in the period from 1 April, 2016 to 31 March, 2017 have been determined as follows. The discount factor for Levelisation of Tariff for Wind Energy Projects works out to 10.55%, as computed in para 1.6 of this Order.

3. SMALL HYDRO POWER PROJECTS AND MINI/MICRO HYDRO PROJECTS

3.1. USEFUL LIFE

The useful life specified for Small Hydro Projects (SHPs) and Mini/Micro Hydro Projects under Regulation 2.1 (mm) of the RE Tariff Regulations is 35 years from COD.

3.2. TARIFF PERIOD

Regulation 7.2 of the Tariff Regulations specifies a Tariff Period of 13 years for SHPs of capacity higher than 5 MW and upto and including 25MW.

Regulation 7.3 specifies a Tariff Period of 35 years for Mini/Micro Hydro Projects and SHPs upto and including 5 MW. The Tariff Period matches the useful life in case of these Projects, reflecting a longer preferential treatment for them.

3.3. CAPITAL COST OF SMALL HYDRO PROJECTS

SHPs, for the purpose of the RE Tariff Regulations, are those Projects located at sites approved by the State Government/ State Nodal Agency using new plant and machinery and with installed power plant capacity lower than or equal to 25 MW. For specifying allowable Capital Cost, SHPs have been classified into two categories based on their installed capacities, viz., a) SHPs above 1 MW and upto and including 5 MW, and b) SHPs of capacities above 5 MW and lower than or equal to 25 MW.

Under Regulation 30.1 of the RE Tariff Regulations, the Commission has considered the normative Capital Cost for SHPs for the first year of the review period as below:

Project Size	Capital Cost (Rs. lakh/MW)
> 1 MW and upto and including 5 MW	605.28
> 5 MW and upto and including 25 MW	550.70

The above Capital Cost has been escalated considering the indexation mechanism specified in the CERC RE Tariff Regulations, as stipulated in Regulation 31 of the Commission's RE Tariff Regulations. The detailed calculation steps are as shown in para. 2.4 of this Order. The normative Capital Cost for FY 2016-17 calculated as per the mechanism specified in the CERC RE Tariff Regulations is as shown in the Table below.

Parameter	Description	SHP of > 1 MW and upto and including 5 MW	SHP of > 5 MW and upto and including 25 MW
1+F1+F2+F3		1.40	1.40
CC ₀ (Rs. Lakh/MW)	Capital Cost for the Base Year	605.28	550.70
P&M ₀ (Rs. Lakh/MW)	Plant & Machinery Cost for the Base Year Capital Cost Escalation Factor	432.34	393.36
P&M _n (Rs. Lakh/MW)	Plant & Machinery Cost for the nth Year (FY 2016-17)	438.18	398.67
CC _n (Rs. Lakh/MW)	Capital Cost for the nth Year (FY2016-17)	613.45	558.13

3.4. DEBT-EQUITY RATIO

In accordance with Regulation 14.1, the debt and equity components for SHPs with capacities above 1 MW and up to and including 5 MW work out to Rs. 429.41 lakh per MW and Rs. 184.03 lakh per MW (i.e., 70% and 30% of the Capital Cost), respectively. For Projects having capacities above 5 MW and lower than or equal to 25 MW, the debt and equity components work out to Rs. 390.69 lakh per MW and Rs. 167.44 lakh per MW, respectively.

3.5. RETURN ON EQUITY

In accordance with Regulation 17.2 of the RE Tariff Regulations, the RoE works out as shown in the Table below:

Particulars	> 1 MW and up to and including 5 MW	> 5 MW and up to and including 25 MW
Opening Equity (in Rs lakh per MW)	184.03	167.44

Further, as explained in para. 1.5 of this Order, IoWC shall be computed at an interest rate equivalent to the average Base Rate of SBI during the previous year plus 350 basis points, i.e., 13.06% (9.56% + 350 basis points).

3.9. OPERATION AND MAINTENANCE EXPENSES

Regulation 34.1 provides for the normative O&M expenses for SHPs for FY 2015-16 (Base Year). Accordingly, the following normative O&M expenses have been considered by the Commission for SHPs for the Base Year:

Project Size	O&M Expenses Norm	O&M Expenses (Rs lakh/MW)
> 1 MW and upto and including 5 MW	3.60% of the Capital Cost	21.79

This O&M expense is to be escalated at the rate specified in the Regulations of the Commission governing MYT over the Tariff Period, as per Regulation 34.2 of the RE Tariff Regulations, for determination of the levelised Tariff. Regulation 45.1(d) of the MYT Regulations, 2015 specifies the norms for escalation of O&M expense in subsequent years beyond the Base Year:

“The O&M expenses for each subsequent year shall be determined by escalating the base expenses determined above for FY 2015-16, at the inflation factor considering 60% weightage for the actual point to point inflation over Wholesale Price Index numbers as per Office of Economic Advisor of Government of India in the previous year and 40% weightage for the actual Consumer Price Index for Industrial Workers (all India) as per Labour Bureau, Government of India in the previous year, as reduced by an efficiency factor of 1%, to arrive at permissible O and M expenses for each year of the Control Period.”

Accordingly, the calculation for escalation percentage for O&M expense is presented in the Table below:
